<input type="checkbox"/> #3	1	At least a few reasonable sentences

Response:

There have been no issues on W3Schools or this platform.

Had to create new file for git on my computer.

I learned to create branches and delete them when practicing in my terminal and just checking out the commands. Was able to learn about staging changes in your terminal before just committing every change I get. Using Git -help also helped me find commands I may have forgotten.
